Subject: JLI Menthol Study

Kim:

yes Do you have a timeline for completion of analyses at MDS related to the JLI menthol study? I thought that on yesterday's conference call someone indicated that the analyses would be complete and QA'd by early December. Is this correct?

Also, I'm trying to update our schedule to capture the estimated completion dates for the following tasks (I think some of our duration assumptions may be too long):

Data Management *December*

Data Analysis *December*

Tables/Graphs available to PM (I'm including b/c I think that we could get these up to almost a month prior to the draft report, and we may need them in that timeframe for review purposes) *mid-January 03*

Draft Report (when completed by MDS and sent to PM) *beginning Feb 03*

Do you think you could help me plug in dates from the MDS side? If possible, I'd like to get our schedule updated next week.

Thanks and let me know if questions.

-Valerie
